Chris, et. al.: attached is a revised version of the letter to governmental organizations regarding the use of alternatives to PCB-containing road striping paints to be approved by the SRRTTF at tomorrow's meeting. I realize that this is a bit late to be posted, so we can simply discuss the revisions to the letter at the meeting which are minor considerations and do not significantly impact the body and intent of the letter. Revisions include the addition of the Idaho Transportation Department and Post Falls Highway District, as suggested by Brian Nickel, and the assignment of me as the SRRTTF point of contact per our recent discussions.

Please contact me should you have any questions or require additional information.

Doug (cc Lucy, Misha and Chris):

I'm glad to see that Idaho utilities were included on the letter about adoption of alternatives to PCB-containing road striping paints.

However, it seems to me that this letter should be sent to all of the utilities in the Spokane River watershed in Idaho that have municipal separate storm sewer (MS4) permits. This does include the City of Coeur d'Alene, the City of Post Falls and the Lakes Highway District, to whom the letter is already addressed. The City of Hayden does not have an MS4 permit, but I think it's fine to send the letter to the City.

I suggest you also include the Post Falls Highway District and the Idaho Transportation Department, District 1. Here are their MS4 permits for your reference:

Contact information for the Post Falls Highway District is available here:
